## Volume 19 (1988)

Akritas, M.G. and S. Kourouklis, Local Bahadur efficiency of score tests (2) 187–199
Babu, G.J., A note on comparison of conditional means (2) 253–259
Baksalary, J.K. and A. Markiewicz, Admissible linear estimators in the general Gauss–Markov model (3) 349–359
Bose, M., *see* R. Mukerjee (2) 261–267
Carmody, T.J., Diagnostics for multivariate smoothing splines (2) 171–186
Choudhury, J. and R.J. Serfling, Generalized order statistics, Bahadur representations, and sequential nonparametric fixed-width confidence intervals (3) 269–282
Corral, N., *see* M.A. Gil (1) 81–94
Dey, D.K., *see* A.E. Gelfand (1) 121–131
Gelfand, A.E. and D.K. Dey, On the estimation of a variance ratio (1) 121–131
Gil, M.A., N. Corral and P. Gil, The minimum inaccuracy estimates in $\chi^2$ tests for goodness of fit with fuzzy observations (1) 95–115
Gil, P., *see* M.A. Gil (1) 81–94
Hedayat, A.S., C.R. Rao and J. Stufken, Sampling plans excluding contiguous units (2) 159–170
Helmers, R. and F.H. Ruymgaart, Asymptotic normality of generalized L-statistics with unbounded scores (1) 43–53
Kageyama, S., On orthogonal arrays attaining Rao's bounds (3) 395–400
Kapadia, C.H., A.H. Kvanli and K.R. Lee, Minimal sufficient statistics for incomplete block designs with interaction under an Eisenhart model III (3) 317–324
Kappenman, R.F., Robust symmetric distribution location estimation and regression (1) 55–72
Kourouklis, S., *see* M.G. Akritas (2) 187–199
Kuriki, S., *see* M. Kuwada (3) 373–382
Kuwada, M. and S. Kuriki, Balanced fractional factorial designs of resolution $2l+1$ or interesting effects orthogonal to some nuisance parameters: $2^{m_1+m_2}$ series (3) 373–382
Kvanli, A.H., *see* C.H. Kapadia (3) 317–324
Lau, T.-S., D-optimal designs of the unit $q$-ball (3) 299–315
Lea, C.-D. and M.L. Puri, Asymptotic properties of perturbed empirical distribution functions evaluated at a random point (2) 201–215
Lee, K.R., *see* C.H. Kapadia (3) 325–340
Lin, G.D., Characterization of distributions via relationships between two moments of order statistics (1) 73–80
Markiewicz, A., *see* J.K. Baksalary (3) 349–359
Milbrodt, H., Limits of experiments associated with sampling plans (1) 1–29
Moore, L.M., Singular factorial designs resulting from missing pairs of design points (3) 325–340
Mukerjee, R. and M. Bose, Non-equirereplicate Kronecker factorial designs (2) 261–267
Peixoto, J.L., Prediction in a class of mixed models with two variance components (1) 81–94
